Period fo	The MAILING DATE of this commun or Reply	ication app	ears on the d	over sheet with the c	orrespondence ad	ldress			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This Office Action is in response to the Election filed July 12, 2006 for the above identified patent application.

Election/Restrictions

1. Claims 5-6 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on July 12, 2006.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The metes and bounds of the desired patent protection is not fully understood. Specifically, it is unclear as to whether applicant is claiming a protective cover, or the

Art Unit: 3682

combination of a bearing device and the protective cover. Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Schottodorf et al. (WO 01/25799).

Schottodorf discloses a protective cap 9 for use in association with a wheel support bearing assembly which includes an outer member 1 having an inner peripheral surface formed with raceways, an inner member 2 having an outer peripheral surface formed with raceways in alignment with the raceways in the outer member, rows of rolling elements 3 operatively interposed between the raceways in the outer member and the raceways in the inner member, sealing units 4 for sealing respective open ends of an annular working space delimited between the inner and outer members, and a magnetic encoder 5 provided in one of the sealing units and having an annular surface exposed bare to a radial face of the wheel support bearing assembly, the magnetic encoder having a plurality of alternating magnetic poles arranged in a direction circumferentially thereof, said protective cap comprising: an annular cover-up portion for enclosing the annular surface of the magnetic encoder that is exposed bare to the radial

Art Unit: 3682

surface of the wheel support bearing assembly, and an engagement wall integral with the annular cover-up portion and capable of being removably engaged in the wheel support bearing assembly, whereby the protective cap is removably mounted on the wheel support bearing assembly.

With respect to claim 2, Schottodorf illustrates the engagement wall (adjacent reference character 12) being removably engaged with one end of an axial bore of the inner member. Note, claim 2 does not require the cap engaging an inner peripheral surface of the axial bore.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the bearing arrangement of Merklein et al. ('518), Aiba et al. ('903), Ichiman ('418), and Ohtuski et al. ('902).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C. Joyce whose telephone number is (571) 272-7107. The examiner can normally be reached on Monday - Thursday 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Ridley can be reached on (571) 272-6917. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
